

Conformance testing

ns339482.ip-37-187-250.eu server No.480256

Processors

- ✔ **Processor(s) ok**
processor(s) detected: Intel(R) Xeon(R) CPU E5-1620 v2 @ 3.70GHz
- ✔ **Frequency: ok**
the frequency of your processors (3700 Mhz) complies with the manufacturers specifications and did not decline during load testing
- ✔ **Load Test: ok**
different load tests have been executed on your server, the server remained stable when they were being carried out
- ✔ **Temperature: ok**
la temperature remained stable during the load tests

RAM

- ✔ **Size ok**
64456 MB detected
- ✔ **Memtest: ok**
without any errors detected during the RAM tests

Bios

- ✔ **Version: ok**
your bios version was approved by OVH, mother card detected: X9SRE/X9SRE-3F/X9SRI/X9SRI-3F, bios version detected: 3.0a
- ✔ **Virtualisation activated**
the vmx or svm flag is present and virtualization is enabled in the bios

Disks

- ✔ **Conforms**
2 x 240 GB ssd + 2 x 2000 GB sata
- ✔ **Reading speed: ok**
sdc (serial number : PN1134P6K59RJW) : 163.16 MB/s
sdd (serial number : PN1134P6K4HDMW) : 157.84 MB/s
sdb (serial number : CVWL4346018M240NGN) : 498.45 MB/s
sda (serial number : CVWL4282010C240NGN) : 512.68 MB/s
- ✔ **Boot disks: ok**
the disks registered on your operating system are: 2 x 240 GB ssd
- ✔ **S.M.A.R.T: ok**
the S.M.A.R.T tests "health status" and "self test" successfully passed on your hard drives
- ✔ **Sector states: ok**
no bad sectors have been detected on your hard drives
- ✔ **Firmware versions: ok**
the firmware versions of your discs were approved by OVH
